1. Mam first when we run the project after doing upload code, the following problem had been shown.....

2. Then I try to solve the problem by the following command, but still shown another problem.....

```
C:\Xampp\htdocs\gronthovandar>composer require "laravelcollective/html":"^5."

//composer.json has been updated

Ladding dospendencies (including require-dev)

Worthing to install or update

Generating optimized autoload files

[RuntimeException]

Could not scan for classes inside "database/seeds" which does not appear to be a file nor a folder

require [--dev] [--prefer-source] [--prefer-dist] [--no-progress] [--no-suggest] [--no-scripts] [--update-no-dev] [--update-with-dependencies] [--update-with-all-dependencies] [--jgnore-platform-reqs] [--prefer-lowest] [--sort-packages] [-o|--optimize-autoloader] [-a|--classmap-authoritative] [--apcu-autoloader] [--prefer-source] [--prefer-stable] [--prefer-lowest] [--sort-packages] [-o|--optimize-autoloader] [-a|--classmap-authoritative] [--apcu-autoloader] [--prefer-stable] [--prefer-stable] [--prefer-lowest] [--prefer-stable] [--prefer-stable] [--prefer-source] [--prefer-stable] [--prefer-stable] [--prefer-source] [--prefer-stable] [--prefer-stable] [--prefer-source] [--prefer-stable] [--prefer-s
```

```
C:\xampp\htdocs\gronthovandar>composer dump-autoload
Generating optimized autoload files

[RuntimeException]
Could not scan for classes inside "database/seeds" which does not appear to be a file nor a folder

dump-autoload [--no-scripts] [-o|--optimize] [-a|--classmap-authoritative] [--apcu] [--no-dev]
```
